## OBJECTIVE

My name is Thomas Mayrhofer and I'm a Linz/Austria based web developer. For my Multimedia Technology studies at the University of Applied Sciences in Salzburg/Austria I'm looking for a four month internship at a web agency to improve my working experience.

## EXPERIENCE

### Freelancer since 2012

Next to my studies at the University I run my own business. This taught me how to deal with customers and how to manage a project from the beginning to the end. Websites I created during this time are <http://may-it.net>, <http://pe-institut.at/>, <http://www.mediterran-linz.at/>

### Intern, Diözese Linz (Linz/Austria — Summer 2012)

During my holidays before I left Linz, I worked as a freelancer for the IT department of the catholic church in Linz. Because of a switch from a Windows to Linux webserver many websites had to be transferred. Therefore I wrote a script to setup all vhosts on the new system and transferred the websites. In this internship I learned a lot about Unix/Linux and about PHP in general.

### Web Developer, Ovos Media (Vienna/Austria — Summer 2010)

As a professional practical training I worked at the web agency ovos in Vienna. Therefore I moved to Vienna for 3 months and earned my first experience in teamwork and therefore made my first steps with VCS. I also created my first 'real' client website <http://www.felixmalnig.at/> and in collaboration with Johannes Weber (jowe) I created <http://100gruende.at/> a website to find local activities for the generation 60+.

### Intern, Media Data (Linz/Austria — Summer 2009)

In Summer 2009 I got a deep insight in the daily routine of an IT company and earned my first experience with the content management system Typo3.

### Intern, Oberbank (Linz/Austria — Summer 2008)

Oberbank is one of the biggest Austrian banks. In my first job I earned my first experiences in dealing with customers and the importance of precise work.

## EDUCATION

### Multimedia Technology at University of Applied Sciences Salzburg

since 2012, Courses taken to date: Backend Development 1, Frontend Development,

### High School for Media Design at Kreuzschwestern Linz

2007-2012, Degree: A-Levels

### Lower Grad School - Kreuzschwestern Schule Linz
